

THE PROCESS

Our mission is to educate, inspire, and engage students in philanthropy, empowering them to be leaders and to serve others.

Each step in our distinctive model magnifies the gifts of donors. These gifts empower the students on their philanthropic journey.

This journey begins with a donation, which is received by Magnified Giving then through our school partnerships, teachers educate students on what it means to be a philanthropist. The students are then entrusted to grant \$1000 or more to their local nonprofits. These students explore, discover, and thoughtfully share concerns about the issues in their community.

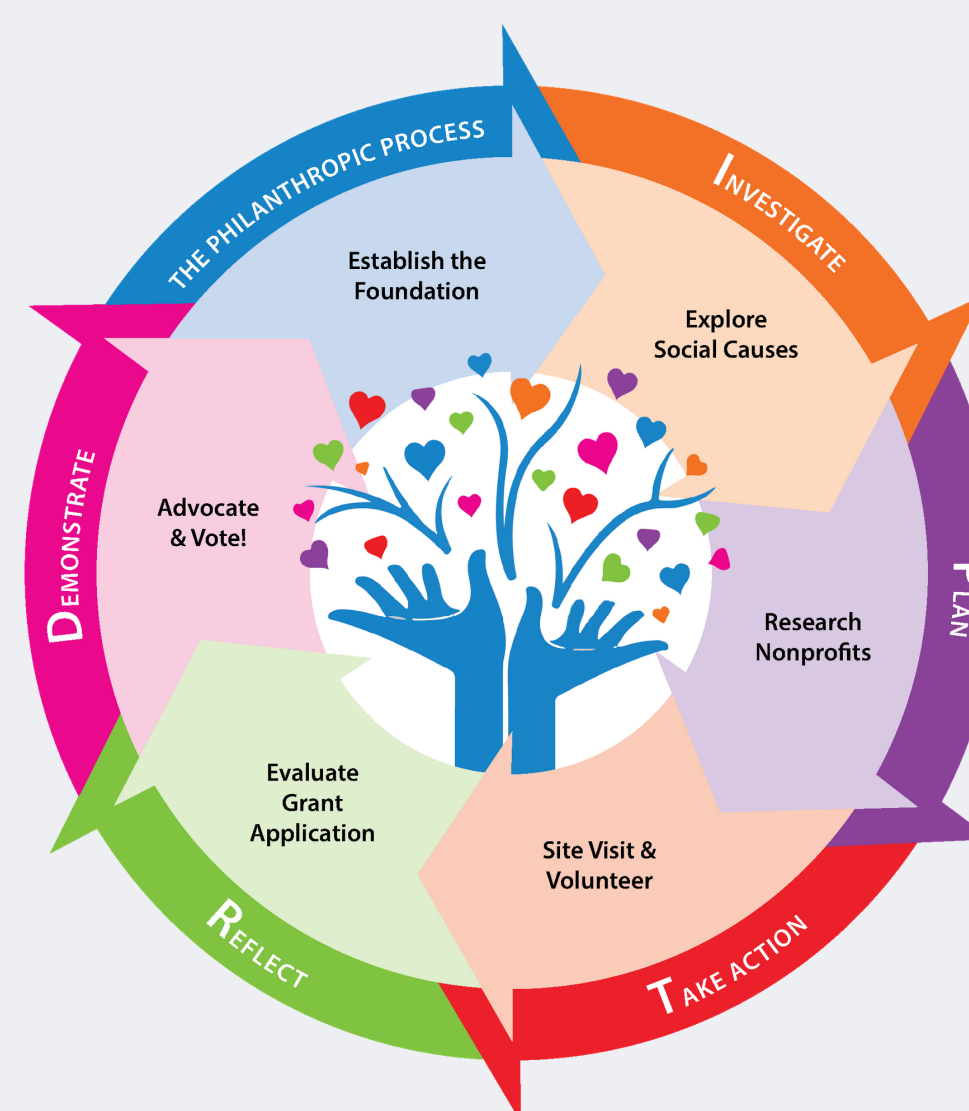

They are empowered to research, serve, advocate and persuade their peers through presentations and vote on a local nonprofit to receive their grant.

Our students are our future and their voices should be heard. Magnified Giving develops the next generation of philanthropists and one donation is magnified for generations.

Through our unique educational model and service-learning method, students discover opportunities to give their time, talents, and treasure to create a positive change in their community - now.

THE IMPACT

Service-Learning is a pedagogy that engages students in academic learning while strengthening community ties. It has been shown to support social and emotional needs like increasing self-esteem and self-awareness in students. Studies have shown that supporting social-emotional learning through service-learning led to an 11% increase in academic achievement.
